Objective

I'm a driven front-end web developer. Mistakes aren't flaws but stepping stones for growth. I've gleaned much from them. If given the chance, I'll continually elevate myself to ensure your choice in me brings no disappointment.

JNV Karimganj
2018
CBSE

HSLC(10th)

Karimganj College
2020
AHSEC

HS(12th)

Projects

- ### YouTube Clone
  https://youtube-clone-kannu16.netlify.app/

- Implemented a functional live search feature.
- Integrated YouTube video API seamlessly into the frontend.
- Developed YouTube live chat capability through Redux.
- Crafted dynamic WatchVideo pages for clicked content.
- Designed a nested YouTube comment system.

- ### ChatGPT Clone
  https://kannu16-chatgpt.netlify.app/

- This project was developed using React.js and Bootstrap. It is a complete clone of ChatGPT, with OpenAI integration via the Rapid API. The project's primary feature allows users to update their API key when they've exceeded their usage limit. Additionally, users can access and review their search history stored in local storage.

- ## Fully responsive website clone
